

CLEANING W.I.S.D.O.M. CHECKLIST

Here's a helpful list of next steps you can take to improve your cleaning program.

WASTE

Find out how much cleaning product you should be using per month. Either contact your cleaning product manufacturer or set up a controlled test for a week.

If you don't use a closed loop system, see if the manufacturer offers that option, or investigate other cleaning systems that do.

INPUT

Set up a suggestion box, and encourage your staff to leave feedback in it. Check it every week, and act on the feedback.

SAFETY

Share some of the facts and figures from this E-book with your supervisor or key decision-makers within the organization. We've made a PDF you can download and give to them or display.

Download your copy here: s

www.enviroxclean.com/CleaningWISDOM

DOLLARS

Figure out how much each in-use quart bottle of your cleaning product costs you and use that as your measure versus case or gallon pricing.

OVERTIME

Take stock of the main reasons that are causing overtime. Investigate the three areas we mentioned first.

MORALE

If you didn't take the quiz in the E-book yet, give it a try. Download the same quiz here so you can print it out and give to your staff. Compare results. You can get your copy here:
